

tio – black brushed brass with dark walnut

A kitchen with the glamour factor

The tio kitchen front in black brushed brass, combined with striking walnut along with discreet black chamfered strip handles looks sophisticated yet at the same time natural.

This timeless kitchen solution is rounded off by a worktop with the extremely matt Nano Fenix Bronzo surface. It goes without saying that this effective anti-fingerprint coating is also ideal for use as a kitchen front. Open metal shelving, in which as seen here classy wine glasses are shown to advantage, lends the linear kitchen design a casual industrial touch.
