

## Press release

## atmos – purist and expressive

Thanks to its linear strip handle, optionally available in stainless steel colour or black anodised, the atmos range with its cubic design language and clear lines never fails to impress.

This kitchen-diner is the central focal point in the house and a meeting place in which to conduct lively conversations with family and friends.

Various authentic materials combine here to create a harmonious overall concept. The creative stone decor in dark slate looks very natural due to its colour and realistic depth effect and provides the perfect setting for the monochrome design featuring our mono lacquer in matt black.

A striking feature of this design is the flowing transition of the drawers and worktop, which is achieved with a special lower handle from the atmos range.

The illuminated narrow glass-framed efecto fronts provide additional homely accents.

A structured and balanced feeling of space is created with the practical wall of tall units. This is impressively underscored by the light chestnut wood decor, which has a rather rustic, vibrant structure and offers an authentic feel to the touch.
