

## Press release

### rational iconic onda

Dynamically rounded fronts and trendy soft lacquers have characterised our onda range for over 20 years.

Our own four walls are the place where people spend most of their time. For this reason, we have chosen our new terra brown soft lacquer for this kitchen design. The warm, earthy natural colour in combination with the high-quality tropical storm granite worktop creates a cosy feel-good atmosphere. It has a grounding effect and conveys a sense of peace and security.

Storage space in abundance is provided by clearly arranged storage cupboards and special round end elements, whose unique shape underscores the flowing lines of the onda still further.

With its expressive fronts and a wide spectrum of colours from well over 20 standard shades as well as all RAL/NCS colours, the onda range allows versatile, characterful and individual customer wishes to be realised.

#### **Caption:**

Dynamically rounded fronts characterise the onda range. The earthy natural colour terra brown creates a cosy feel-good atmosphere. It has a grounding effect and conveys a sense of peace and security.
